

Sustainable Development Goals (SDG) are a universal call to act proactively for the well-being of planet earth and its people. Consideration of the 17 goals revealed that SDG 12 monitoring and reporting in South Asia has the most disparate need for progress. Due to that reason, a baseline survey was conducted by National Cleaner Production Center Sri Lanka with the support from the EU SWITCH-Asia Regional Policy Advocacy Component (RPAC)

South Asia region summary on SDG 12 Monitoring and Reporting

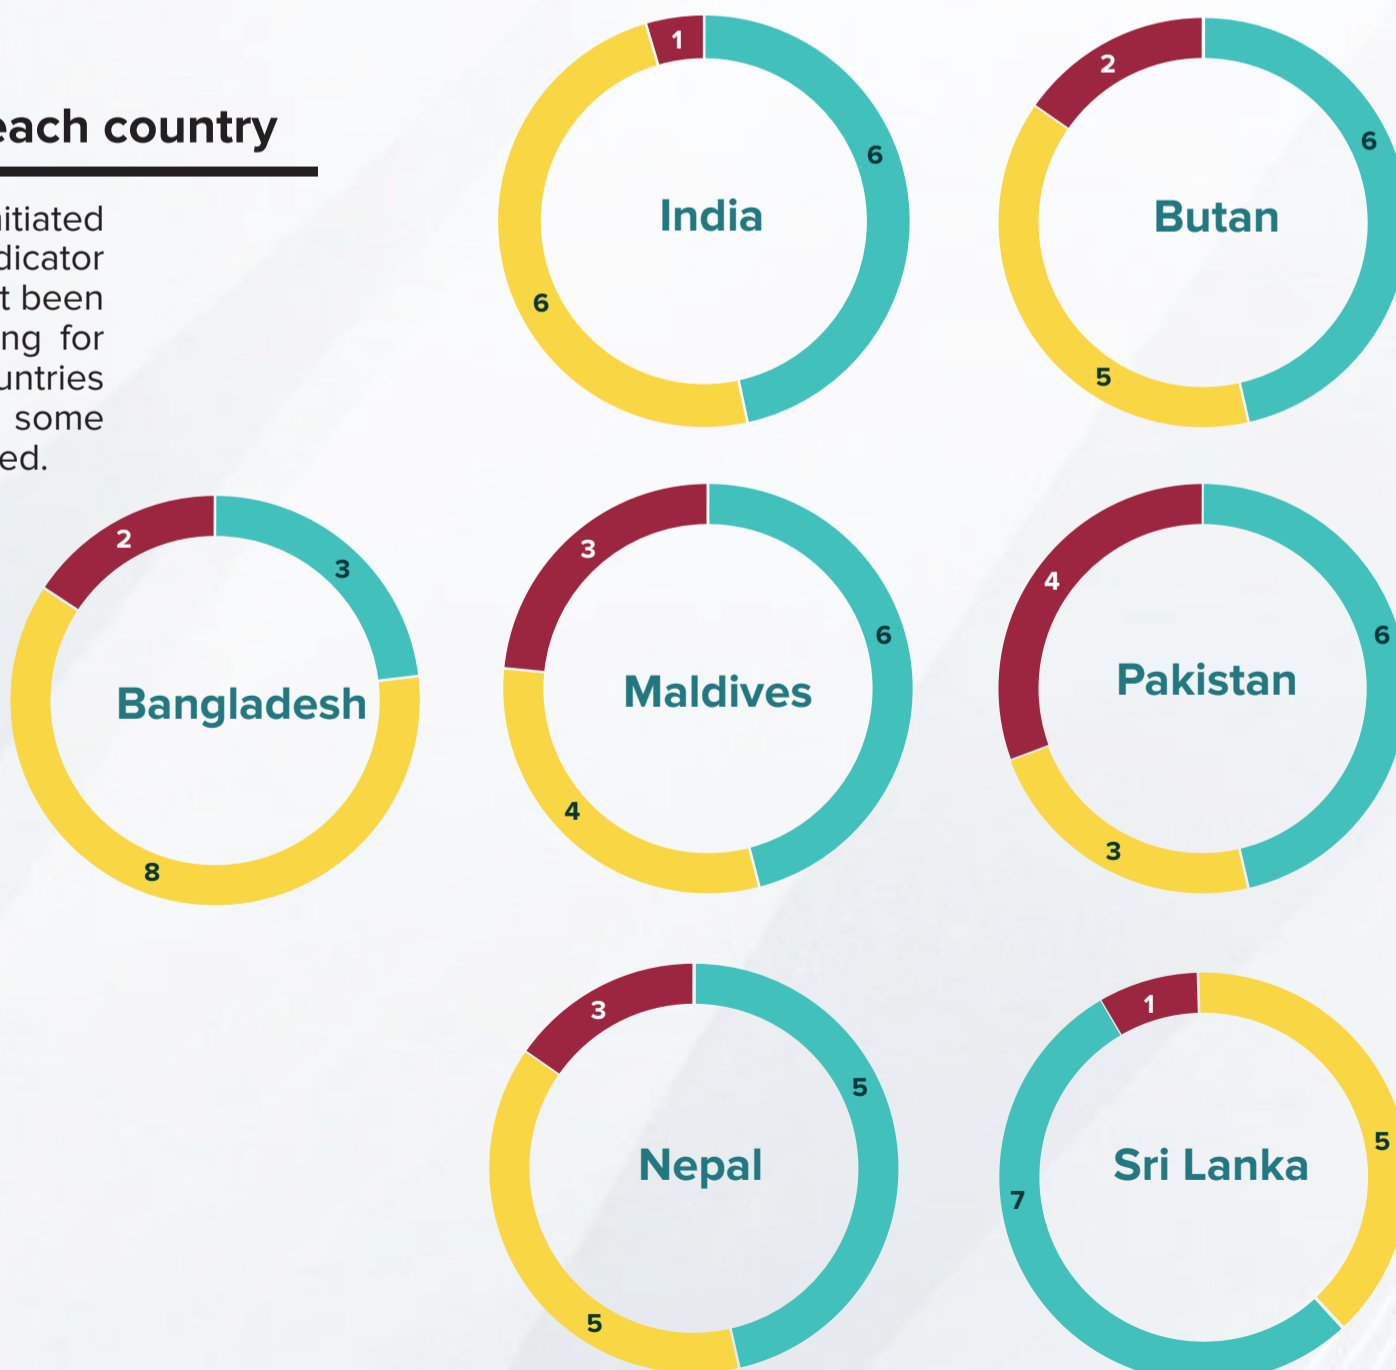

Number of countries under each category; reporting, partially reporting and not reporting are indicator wise presented in 7 countries of the South Asian Region.

- Not Reported
- Partally Reported
- Reported

SDG 12 Reporting and Monitoring Summary of each country

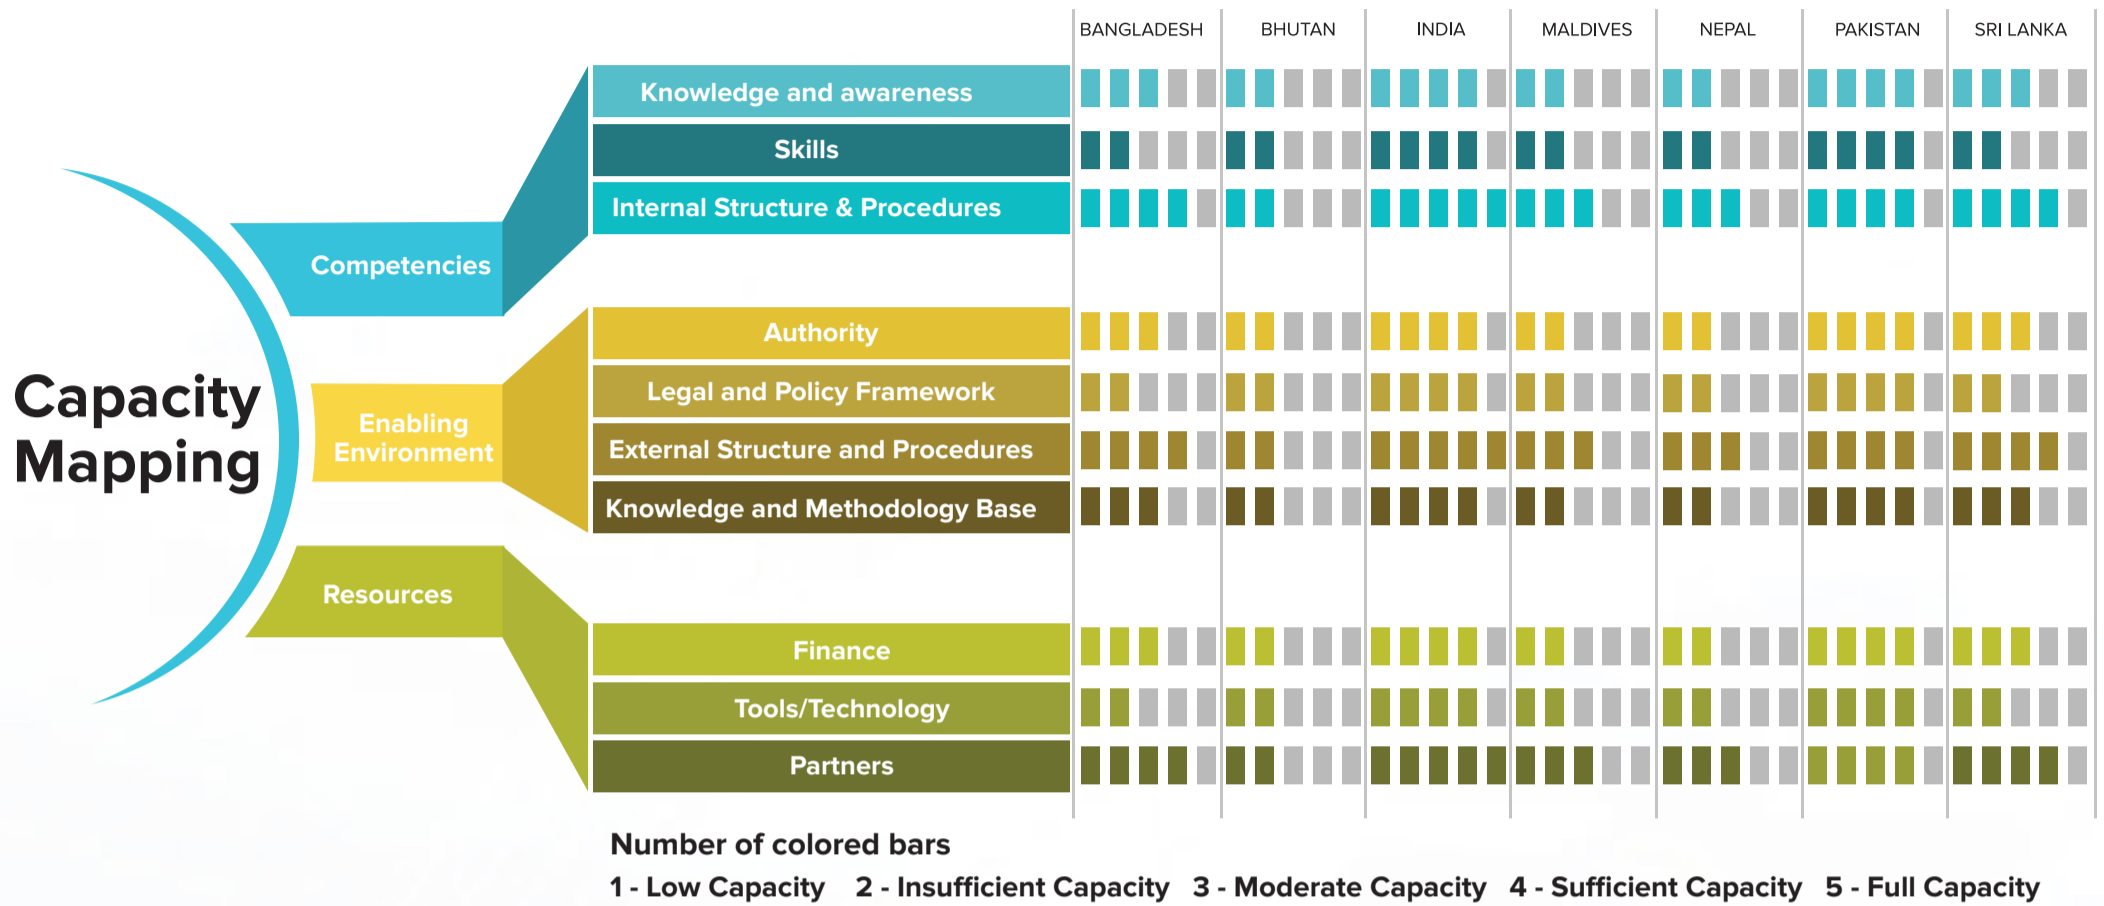

South Asian countries have been initiated their journey to achieve SDG 12 indicator goals. But all the countries have not been completed reporting and monitoring for each and every indicator. All the countries have some areas to develop while some are there to be triggered and initiated.

- Not Reported
- Partally Reported
- Reported

Capacity Mapping

Capacities in all three areas of competencies, resources and enabling environment of seven countries in the South Asian region

Way Forward

To enhance the efficiency of SDG 12 reporting and monitoring, the identified gaps must be addressed.
