

WEBINAR: CONTEXTUALIZING THE CIRCULAR ECONOMY FOR ACTION

A FEW PERSPECTIVES FROM ASIAN COUNTRIES

4 February 2021, Thursday | 14.00 hrs
Bangkok Time ICT (Indochina time) UTC/GMT +7 hours

BACKGROUND

The basic aim of the webinar is to understand the concept of a “Circular Economy” from the context of developing economies in Asia. It explores the dimensions of a circular economy as the nexus of four key issues – Food, Energy, Water and Waste, the the “FEWW Nexus”. It is targeted at national and local government officials (and their stakeholders) responsible for developing circular economy policies and action.

The webinar presents the “GET Matrix” as a concrete multi-stakeholder policy tool, bringing together three policy patterns – the Global-National-Local pattern; the Governments-Business-Civil Society pattern; and the Governance-Education and Technology pattern.

The webinar and its subsequent outputs are being presented by graduates of the now-subsumed Human Settlements Development Division of the Asian Institute of Technology, who graduated in 1991. Each presenter will take up one element of the circular economy, and will present examples and priorities for the specific country of their residence.
